<b>Office Action Summary</b>	<b>Application No.</b> 10/564,732	<b>Applicant(s)</b> KNOX ET AL.	
	<b>Examiner</b> HONGMIN FAN	<b>Art Unit</b> 2612	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Method and system for determining smoke particles filter usage.

### ***Claim Objections***

Claims 15-16 and 18-20 objected to because of the following informalities: the dependencies are at the end of claims. They should be declared at beginning of the claims.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Solak (US 5821865).

As to claim 17 and 20, Solak disclosed a hazard detector wherein a smoke sensor in an interior of the lower compartment (i.e. detection chamber) for closing the

circuit means (i.e. signal indicating) upon detecting a predetermined amount of smoke particles collected in the lower compartment upon entry through the aperture (col. 3, line 66-col. 4, line 3).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Solak.

As to claim 20, Solak disclosed a control circuit (see Fig. 4). Solak did not disclose a computer usable medium having computer readable program code for performing the method of claim 17. However, it is very common and widely known in the art to use a general purpose microprocessor with memory to substitute complex control circuit due to it's flexibility in mass distribution and cost. Therefore, it would have been obvious to one of ordinary skills in the art at the time of the invention to substitute the control circuit with a microprocessor with memory in Solak's detector due to due to it's flexibility in mass distribution and cost.

### ***Allowable Subject Matter***

Claim 1-14 are allowed,
